

## *Fermo VIS*

Single head cutting-off  
machines

Stop gauge system with profile support, positioning of the stop via handwheel and reading of position on the digital readout. Tolerance on positioning  $\pm 0.5$  mm.

### **VIS digital reader**

Digital display that allows reprogramming of machine 0, indicating the stop positioning dimension, which corresponds to the length of the workpiece to be cut.

### **Handwheel**

By means of the handwheel, the stop is brought into position.

### **Reference stop**

Carriage running on ball bushing actuated by mechanically controlled kinematics, which allows, referring to the centre of the blade, the realization of the length of the workpiece to be cut.
