FP WORKSHOP

EMMEGISOFT OFFICE CALCULATION SOFTWARE

FP Workshop is an additional WEB module of FP PRO (at least “Standard” version), for the support to workshop operators and the collection of production events. It is composed of:

- a management and configuration module for monitoring the production progress by intuitive graphical reports;
- a module dedicated to production operators for consulting job’s specific technical documents and company’s documents, printing labels for the recognition of the finished product in the worksite, tracking activities and reporting non-conformities by automating the management of the CE marking;
- an optional module, ZOOMER, dedicated to real-time display of production status via an intuitive graphic synoptic.

FP Workshop can automatically receive the production data (status, times) from the properly predisposed machines.
