FP CAM “LTX”

EMMEGISOFT OFFICE CALCULATION SOFTWARE

Additional module of FP PRO (at least "Executive" version), for the graphic programming of 5-axis machining and management of the Cutting Module (list of bars). Programming is done by displaying, in 3D, workpiece and tool and applying, parametrically, the standard figures: holes, slots, pocket, key-holes, etc. Each piece can be simulated and printed out until the generation of the working list, for the FP PRO’s job, in the formats "LDA", "NCW" and "XML" that are compatible with the main machining centres.
