

FP PRO "EXECUTIVE" - TERMINAL SERVER

EMMEGISOFT OFFICE
CALCULATION SOFTWARE

FP PRO:

FP PRO is the main FP SUITE program since it includes the basic functions used by all door/window makers: door/window design, job definition and calculation, analytical estimate, purchasing management, generation of workshop work lists, heat transmission calculation, CE mark management. It comes in 5 versions and is suitable for companies of any size. It is easy to use and employs a userfriendly graphical interface displaying real profiles, multi-joints, sections, 3D styles. It can operate in a network where files are shared over an SQL database.

"EXECUTIVE" version:

The version for management of the cutting/machining "integrated system". In addition to all the window and door functions, it includes graphic control of the machining operations and linking with Cutting-off machines and Machining Centres. It includes the "EASYMAC" function to associate the machining processes with the fittings, so as to quickly obtain the work lists to be sent to the Centre.

"EXECUTIVE" - TERMINAL SERVER version:

The version for Terminal Server (in which both software and data are installed only on the server) has the advantage of an easy maintenance, an increased operating speed and a flexible use, also from remote locations via the Internet, under the condition of not exceeding the maximum number of allowed concurrent users.

**FP PRO “EXECUTIVE” - TERMINAL SERVER / EMMEGISOFT OFFICE CALCULATION SOFTWARE****TECHNICAL CHARACTERISTICS**

Use of profiles in aluminium, wood-aluminium, PVC, steel	●
Rectangular styles design	●
Casement windows, sliding windows and shutters management	●
Fittings management and making of parametric kits of fittings	●
Graphic representation of multi-joints	●
Graphic representation of dimensioned sections	●
Costs definition for: profiles, glazing, panels, fittings and gaskets	●
Calculation of price lists for pieces, accessories, glasses and panels	●
Optimization with short bars use	●
Analytical calculation of the estimated costs	●
Heat transmission calculation	●
CE mark management	●
Styles, estimates and price lists exported to Word, Excel, etc.	●
Handling of utilisation permits	●
Design of structures with intermediate angles	●
Composition of orders to suppliers	●
Connection to compatible cutting-off machines	●
Connection to firm control programs	●
Styles and sections, in DXF format, exported to CAD program	●
Arched styles design	●
3D styles display	●
Networking archives sharing (MySQL)	●
Price list calculation and connection to FP DEALER	●
Job groups management	●
Search for ideal bar length in optimization	●
Connection to FP GEST for company management	●
Estimate customization through Crystal Report	●
Connection to FP WORKSHOP	●
Integration with FP CAM/CAMPLUS for machining management	●
Parametric application of the machining to the style	●
“EASYMAC” function to associate the machining with the fittings	●
Working list creation	●
Connection to compatible machining centres	●
